

FAQs

What kind of engineering graduates are you looking for?

Electrical controls and instrumentation skills; Mechanical Engineering; Mechatronics. These are the most relevant fields. We accept international applicants.

Is engineering consultancy well paid?

Yes. Good engineering consultants need technical and business skills. It is unusual to find people with both skills. They are highly valued.

Describe the typical day of a Graduate Project Engineer.

Researching a new piece of technology; organising contractors; attending client meetings; briefing equipment suppliers.

What do you look for in a Graduate Engineer?

An active listener, calm, very good with people, someone who can inspire confidence.

Is there something that sets your graduates apart?

Curiosity and wanting to know how things work. They are practical and observant. They are skilled at diagnosing electrical and mechanical problems.

Is travel involved?

Yes, expect to travel in the UK, with some travel in Europe.

Is the job challenging?

Yes, you will be juggling more than one project. You need to be accurate and organised.
